

I am not in favor of any proposal that would lessen Indiana's Telephone Privacy law protections. Since Indiana's law has been enacted I have gone from 5 - 10 telemarketing phone calls per day to ZERO. I no longer cringe when I have to answer the phone and deal with a rude telemarketer that won't take no for an answer. I am no longer interrupted during dinner or woken up at 7:00am on a weekend. I was also able to sign-up my 85 year old Grandmother who no longer receives calls from telemarketers who take advantage of her kindness and age. I do not want to receive any calls, even from businesses I have used in the past. If I want something I will call them. Thank you for reviewing my comments.
